OBJECTIVE

Develop efficient and intuitive user interfaces via Front end best practices for web applications while continuing to learn and expand my knowledge of emerging web technologies.

PROFILE

A self-motivated professional with experience dominant experience in front end web development, plus marketing and design on high traffic websites including typeform.com, ryanair.com (largest low cost airline in Europe), typeform.com, healthdirect.gov.au (more than 200K visits per week), carergateway.gov.au, altroconsumo.it, cattolica.it, knowledgetoaction.co.uk and romaincampagna.it.

DEMONSTRATED STRENGTHS INCLUDE:

- Working independently, also efficiently and accurately within a large team of developers, designers, product managers and project managers utilizing Perforce to manage code, Jira to manage bug tracking and Rally to assist in the Agile software development methodology as well as Waterfall environment.

- Strong knowledge of web 2.0 best practices for Front End scripting, SEO, UX, Social Networking, Split A/B Interface Testing, Content Sharing, Asynchronous Backend / Frontend, RSS and JSON/JSONP.

- The ability to plan strategically and work through highly iterative design and UX journey phases while meeting strict deadlines within Agile Scrum Team methods.

- Proven ability to continually learn and grow within the field of web development, design and marketing. Most of my skills nowadays are self taught with the help of mentors, online resources and challenging projects within a professional environment.

EXPERIENCE

Senior Front-End Developer – Typeform – MAR 2017 – CURRENT
typeform.com / Barcelona, Spain

Typeform is a Barcelona-based online software as a service company that specializes in online form building. Its main software creates dynamic forms based on user needs. Typeform's software has been used by Apple Inc., Airbnb, Uber and Nike, Inc.

- Creating and implementing front end from scratch to final product for the new Results panel for the Typeform re-branding, gathering all form data and responses collected from users in the account dashboard, fully implemented with webpack, redux, es6 / 7 / 8*, scalable react components and test jest suite

- Implementing and Integrating Typeform components into main platform

- Conducting react training / mentoring session within the company

- Active member of the Seniors Frontend at Typeform, including maintenance and reviewer of shared internal libraries / components

Senior Front-End Web Designer / Developer – Procom Group - OCT 2012 – JUN 2013
blendmedia.it / Rome, IT

Procom Group is a cross media agency in Rome IT operating with major Italian and International brands.
By working closely with experienced professionals from editory, web, tv and web tv I had the chance to enlarge my personal and professional prospective.
My major rule in this company was in most part undertaking and developing from scratch clients websites, where it was required a deep architectural study of the product as well as their competitors presence on the web.

- Develop from blueprints to the final for the final product for new and existing websites to engage as much as possible the final user.

- Mobile first approach and downscalable website architectures.

- Developing an maintaing Cattolica Assicurazioni http://www.cattolica.it/ web portal and affiliated product website , one of the most important Insurance Company in Europe, using Alfresco and hand-written Frontend MVC.

- Designed and developed Progettodivita.it, a web portal supported by a young community that operates nationally to provide services to the young generation of work force.

- Design and develop sites and email marketing assets for each client.

- Menthoring and assisting clients during the all process of the projects development.

- Main web technologies used while in this position include javascript, Backbone.js, jQuery, PHP, HTML/CSS, JSPX, XML, RSS and Git

- Main platforms used while in this position include AlFresco, Magento, OsCommerce

Senior Front-End Web Designer / Developer - VizionOnline ltd. - OCT 2011 – OCT 2012
viziononline.co.uk / London, UK

VizionOnline is a professional website design service London UK working with a number of leading brands.
As the most experienced member of the team I had a heavy influence on the running of the department. As such, I used my existing knowledge and experience to increase the efficiency of the team and improve the quality of their work.
Furthermore, as part of my commitment to learning I began to study User Experience Design which lead to me introducing a range of user-centred design techniques into the development process. This new focus on the experience of the end-users transformed the agency's output from quite standard websites for local businesses to high-traffic websites and ecommerce solutions.

- Build and maintain from psd to the final for the final result for new and existing websites to support new web 2.1 standards.

- As lead of a internationl teamwork, I manage in maintaining/adding features requiring AJAX, DOM manipulation and API interaction. This includes website features such as a mobile optimisation, cross-browsable testing with multiple devices, SEO, user-friendly front end, eye-catching layout.

- Designed and developed Prelet.co.uk one of the most known and used website for Landlord furntiures impleted by using OpenCart and hand-written modules to support high-flow remote management with pre-compiled xls files.

- Design and develop sites and email marketing assets for each client.

- Create a modify existing modules for Wordpress,OpenCart and Joomla to client's specs according to the newest standards available at the moment achieved in most of the cases with PHP and Jquery.

- Helped launch a more outstanding corporate website for VizionOnline.

- My foremost contribution to the front-end team is to work client-side ideas and prespective management of the final produc to provide a practical pixel perfect UI based on the design team's specs. This is achieved mostly with HTML/CSS in a PHP framework. A strong understanding of javascript/jQuery and basic understanding of PHP is required to achieve success with this. In most of the cases I created UI mockups in Photoshop and provide them to the clients to help find a practical design solution that supports quality visual design, feature extensibility and code efficiency.

- My workflow includes managing my own team projects using Adobe Suite, IIS and Apache. For development workflow I use Dreamweaver/Coda, JSLint, firebug (firebug lite for IE), chrome devtools, jsfiddle, jQuery, jQueryUI, YSlow and W3C and CSS Validator.

- Main web technologies used while in this position include javascript, Backbone.js, Angular.js, jQuery, Grunt, PHP, HTML/CSS, JSPX, XML, RSS and Mercurial

- Main platforms used while in this position include OpenCart, Magento, Wordpress, OsCommerce

Senior Front-End Web Designer / Developer - Teknoassist - SEP 2009 – OCT 2011
teknoassist.it/ Rome, IT

Teknoassist is a leading company providing web services particularly focused on lawyers. Lead for the Teknoassist corporate website and supervised a team of developers to assure consistency throughout all online channels.
Consulted on-site with clients for design and development of information kiosks. Developed training materials to be used by publishing experts in the development of italian law online

materials. Assisted in the creation of company Web Standards and the mentoring of new employees. Developed Style Guides to streamline communications with cross-functional teams. Designed and deployed PHP/Javascript applications for divisional intranets to be used as educational tools.

- Assist in the planning process for all site marketing initiatives

- Design and develop site and email marketing assets

- Maintain the company's brand and strategy through all web channels

- Provide creative and content support for social networking and affiliate programs

- Migrated content to new platform for a major site-redesign

- Retrofitted all existing HTML/CSS to validate

- Create and mantain a well-structured data-entry platform for a national well-known law consultancy company in Italy

- Implemented SEO on all static web content

- Won company award "Sito web dell'anno 2011 – Categoria : Confronto" ('Website of the Year 2011 – Category: Compare') www.altroconsumo.it, entirely developed and designed by the internal team.

- Create and implement a hand-written Corporate CMS

- Most work was accomplished using Adobe CS5,Coda,Dreamweaver, firebug,W3C and CSS Validator

- Conducting competitor analysis on competitors websites to identify the strengths and weaknesses of alternative solutions or new approaches.

- Main web technologies used while in this position include VanillaJS, AJAX, JSON, jQuery, PHP, HTML/CSS

- Main platforms used while in this position include OpenCart, Wordpress

Web Developer – Dexma srl - JUN 2006 – AUG 2009
dexma.it / Rome, IT

I was employed on a Full Time basis as a Web Developer. During this stage of my career I matured a successful vision of what the key points are to deliver a valuable and usable website thanks to my experienced colleagues whom introduced me first on the best trends in web development and then to consolidate my professional knowledge. At Dexma I have mostly worked on the following activities.

- Marketing researches on competitors and users tendencies online.

- Improving and creating implementations of both back and front end on existing websites and associated products such as cms and newsletters.

- Testing, debugging websites and related products.

- Programming according to latest trends and standard guidelines meeting.

- Producing maintainable documentation and dev-ops guidelines.

- Provided IT support.

- My main projects at Dexma is Romaincampagna.it (financed by the Tourism Organization of Rome) in developing the front-end applications of the whole platform.

- Retrofitted all existing HTML/CSS to validate.

- Main platforms used while in this position include Joomla, Zencart, MailChimp.
